Lewis Marketing videos, starring Howie

Michael's standing rule: every video made for Lewis Marketing includes Howie, the 3D-style (shaded, glossy) robot from the Build For Growth video, with the same style and design. Never redraw him from memory or "improve" his look; paste the artwork below exactly.

Brand

- Colors: navy #0A1F44 (background), blue #046BD2, sky #29A2DE, emblem blue #2BA2DE, sun yellow #F4C542, mist #F5F7FA, emblem black #1C1C1C, cheek pink #FF8FA8.
- Type: Outfit (weights 400 to 900). In a sandbox, install with `npm i @fontsource/outfit@5.0.13` and embed the woff2 files as data URIs.
- Always use the FULL Lewis Marketing logo when naming the company (white wordmark version below works on navy). Inline in a sentence: height about 92 to 96 px on a 1080p frame.
- Look: deep navy radial-gradient background with a faint dot grid, a thin rising "growth line" across the bottom, bold Outfit headlines, yellow highlight words.

Howie

- Personality: helpful, upbeat, always pointing people to the next step.
- Catchphrases: opens with "Hi, I'm Howie!" (speech bubble, soft pop sound) and closes with "See you inside!".
- Behavior in every video: hops in and waves at the camera, points at whatever is being explained, cheers on big moments (offers, results), hops between scenes, blinks every few seconds, antenna wobbles, grin opens when excited, squash-and-stretch on landing, soft floor shadow that shrinks when he jumps.
- His chest badge is the REAL emblem (data URI below), never typed "lm" text.

Artwork (paste verbatim; replace EMBLEM with the emblem data URI)

The SVG sits in a 200x240 div `#mw` whose feet point is (100,240). Element ids are the animation rig.

Rig (pivots and parts)

- `m-armL` rotates around (140 258), `m-armR` around (280 258). Arms hang down at angle 0; raise outward with `rotate(aL 140 258)` and `rotate(-aR 280 258)`.

- `m-fL` / `m-fR`: pointing finger, shown only in pointL / pointR poses.
- `m-eyes`: blink with `translate(0 134) scale(1 0.12) translate(0 -134)` for about 0.14 s every 3.3 s.
- `m-sprout` (the antenna): wobble `rotate(8*sin(t*2pi*0.9) 210 46)`.
- `m-smile` / `m-open`: show the open grin while waving, cheering or mid-jump.

Motion engine (deterministic, driven by one time value so frames can be rendered)

```
// MV: moves place his feet {t,x,y,s,d,h} (d = hop duration, h = hop height). PO: poses {t,p:'idle'|'wave'|'pointL'|'pointR'|'cheer',a:angle}
// Element refs: mw=#mw, ms=#ms, mAL=#m-armL, mAR=#m-armR, mFL=#m-fL, mFR=#m-fR, mE=#m-eyes, mSp=#m-sprout, mSm=#m-smile, mOp=#m-open

```

Typical scale on a 1920x1080 stage: s 1.1 to 1.5 for hero moments, 0.8 to 1.25 beside content. Keep him clear of text: check frames, and move or shrink him where he overlaps.

How to build a Lewis Marketing video

1. Ask format (16:9, 9:16, 1:1), length and call to action if not given. Default: 16:9, generous pacing.
2. Write a hook-first script. Michael likes the Build For Growth pacing: every scene holds long enough to read comfortably (feature scenes about 4.5 s). Keep entrance animations quick (0.5 to 0.7 s) and stretch the holds instead.
3. Build one self-contained HTML page with a 1920x1080 stage where every frame is computed from a single time value (`window.__seek(t)`), plus Play, Replay, scrub and a "Turn sound on" button for the published version.
4. Render the MP4: Playwright (preinstalled) at 1920x1080 with `window.__RENDER=true`, seek frame by frame at 30 fps, pipe JPEG screenshots into ffmpeg (`libx264 -crf 18 -pix_fmt yuv420p -movflags +faststart`).
5. Audio: compose an original track (no stock music) with numpy/scipy: upbeat major progression (C G Am F), tempo chosen so the big reveal lands on a bar line, a riser into the reveal, impacts on key moments, a piano breakdown before the end card, final chord. Add a whoosh (band-passed noise sweep, panned in his travel direction) on every Howie move, lighter for small hops, and a soft pop for his speech bubbles. Master to about -14 LUFS and mux AAC 192k.
6. Check sampled frames (contact sheet) for overlaps and readability before delivering. Publish the playable page as an artifact and send the MP4.

Assets (data URIs)

Emblem (transparent PNG, blue l + black m; put on Howie's chest badge):

```
[base64 image data omitted: use the emblem / logo PNG files in the 02 Artwork folder]
```

Full Lewis Marketing logo (white wordmark with blue emblem, for dark backgrounds):

```
[base64 image data omitted: use the emblem / logo PNG files in the 02 Artwork folder]
```

If higher-resolution files are needed for large placements, ask Michael for the original logo files.
